

## Connecting Experience Create to Educate

AGE GROUP

7+

AMOUNT OF PEOPLE

3+

TIME

1 – 2 WEEKS

OBJECTIVE

To identify inequality in your community, and create something to teach others about it.

MATERIAL

Paper, markers, Paint etc (depending on what you plan to create)

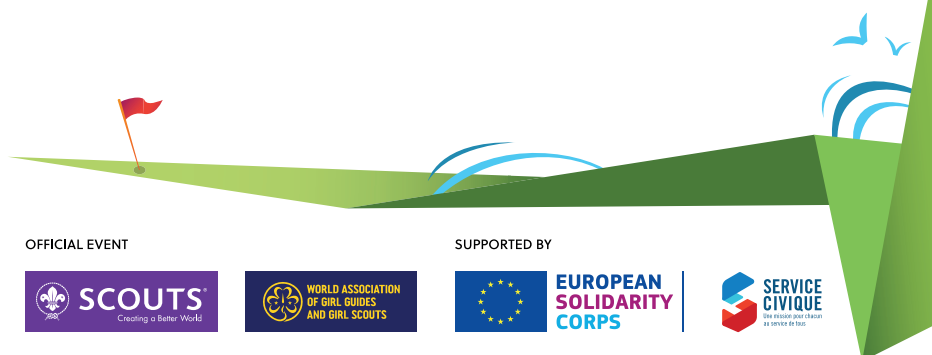

### Instructions

Start by identifying an inequality within your community, this could be related to disability access, economic gap, race, gender or anything else.

Discuss different ways to tackle this inequality, what can you encourage people to do?

Based on your discussion create a piece of art. You could do one big piece, several smaller pieces together in a showcase, individual pieces etc.

These pieces should help raise awareness of the inequality the group identified and promote ways to tackle it. If there are already organisations tackling these problems in your area you could collaborate with them.
