

Connecting Experience

Carbon Footprint

AGE GROUP

11+

AMOUNT OF PEOPLE

1+

TIME

40 MIN

OBJECTIVE

To learn about the carbon footprint, to think about their consumption.

MATERIAL

Papers, internet access or library, pen

Instructions

Start by discussing what they think is meant by a carbon footprint, what actions they think increase or decrease the effect.

Carbon footprint is a calculation of the amount of CO₂ released into the atmosphere as a result of the activities of a particular individual, organisation, or community.

Do the test to find out your carbon footprint.

<https://www.footprintcalculator.org/>

Debrief:

- ▶ Was your carbon footprint bigger than you expected?
- ▶ What are some ideas you have to lower your impact?
