

## Connecting Experience Recycling relay

AGE GROUP

7+

AMOUNT OF PEOPLE

10+

TIME

20 – 30 MIN

OBJECTIVE

To learn about the innovation around them, to discover another way to consume.

MATERIAL

Open space to run around in, different type of garbage or cards with the name of the garbage on it, 4 bins labelled "reuse", "recycle", "trash", "compost" (if your country has a specific colour for the bin use it!)

### Instructions

Split the group into teams, with enough rubbish that each participant gets at least one turn.

The teams will race each other, starting by grabbing a piece of garbage, then going through an obstacle course which finishes at their team's set of bins. They must put their piece of garbage into the correct bin and then run back to their team so the next person can go.

The team that finishes first is awarded 5 points and then each team gets a point per piece of rubbish they've placed in the correct bin. The winner is the team with the most points.

### Debriefing:

- ▶ Is it easy to recycle?
- ▶ Can you do it everywhere? At home? At school? On the street?
- ▶ What do you do when you see trash on the ground?
- ▶ Do you think everyone knows what the right bin to use is?
- ▶ What could you do to help people learn what bin to use?
