

## Connecting Experience

# Fishing for information

AGE GROUP

11+

AMOUNT OF PEOPLE

5+

TIME

30 MINUTES

OBJECTIVE

To learn how some types of fishing are better for the ocean than others.

MATERIAL

n/a

### Instructions

Have participants research different methods of fishing, focusing on the sustainability of each, and the harm they may cause. Hold a group discussion where participants share which methods they think cause the most and least harm. Set them the task of investigating where their fish comes from, is it sustainable? Or is there a different choice they could make that would be more sustainable?
