

## Connecting Experience Water clean up

AGE GROUP

7+

AMOUNT OF PEOPLE

5+

TIME

1 - 2 HOURS

OBJECTIVE

To reduce the pollution of water sources locally.

MATERIAL

Bin bags and gloves

### Instructions

As a group, choose a local area such as a river, lake, beach or any other water area that needs to be cleaned up. Have the participants create a plan for how they're going to collect rubbish, where they will dispose of it etc.

Depending on the size of the area, they might decide that they need to ask the community for help to complete the clean up.

Before heading to the area, ensure they know the danger of getting too close to the water, and to be careful not to touch anything sharp etc.

### Discussion:

- ▶ Were you surprised by how many bags you filled?
- ▶ Why do you think people litter in this area?
- ▶ What is something you can do to help keep the area clean?
