

Connecting Experience

Even the Insects Matter!

AGE GROUP

7+

AMOUNT OF PEOPLE

5+

TIME

30 MINUTES

OBJECTIVE

To learn that every species is important for our ecosystem.

MATERIAL

Dominos or small blocks

Instructions

In small groups, participants create their own domino effect or chain reaction. Every block should knock over something else and so on until they all fall.

When participants complete this task, they should set up their course again. Before they knock it again, remove some blocks from along the course. When they try again, the chain should stop at some point.

Discuss how every aspect of nature is like one piece in their domino chain, each plays an equally important part in our eco system. If we lose even one piece, everything suffers.

Debrief:

- ▶ What can you do to help protect insects?
- ▶ What can people do to help species that are in danger of dying out?
