Instructions

Earth hour is a global event which takes place every year on the last Saturday of March.

The idea is to switch off.

The point is to switch off every light in your home from 8:30 PM to 9:30 PM your local time. The goal of the movement is to raise awareness about climate change.

Before the event, participants should promote the event with others in the community, aiming to get as many people as possible to take part.

On the day, take part in the event and switch off your lights!
