

Connecting Experience Barriers to Education

AGE GROUP

11+

AMOUNT OF PEOPLE

10+

TIME

1 - 2 HOURS

OBJECTIVE

To explore what stops people from accessing education in your community and abroad.

MATERIAL

n/a

Instructions

Participants should begin by researching education in their local area and finding factors which stop people from being able to take part in education.

Together, discuss the different things they've discovered and what needs to be changed in their area to tackle these issues.

Pick a different country and research barriers to education there. If possible, connect with Scouts or Guides from this country and discuss with them. Some suggestions for questions:

- ▶ What age do you start school at?
- ▶ Do you receive books and food at school?
- ▶ What subjects do you learn?

After their discussion or research, participants should create a display or present back to the other groups what they've learned about barriers at home and abroad and their ideas of what can be done to break them.

Debrief:

- ▶ Are the barriers in other countries the same or different to the ones in your community?
- ▶ What can you do as Scouts and Guides to break down these barriers?
