

## Connecting Experience Water Exploration

AGE GROUP

11+

AMOUNT OF PEOPLE

4+

TIME

1 - 2 HOURS

OBJECTIVE

To create awareness of water in our surroundings and the relationship between water and human life.

MATERIAL

Map, paper, pens, camera (optional)

### Instructions

Split the participants into small groups and give each group a map, paper, pen and a camera (optional). A route can be marked on the map, you could give them co-ordinates to follow, or they can decide on their own route within a marked area.

Each group should walk along their route looking for water. When they find some, they should think about the following questions:

- ▶ Where is the water?
- ▶ What is it used for?
- ▶ How much water is there?
- ▶ What does it look like? (colour, smell...)
- ▶ Can humans drink it? Can animals drink it?
- ▶ If they have a camera, they can take a picture of it.

When the groups have returned each group should present what they discovered.

Debrief:

- ▶ Were you surprised by the amount of water you saw?
- ▶ How does the water you found fit into the water cycle?
- ▶ How does the water help us?
- ▶ How does the water help plants and animals?
- ▶ Is there any water that you can't see?
