

Connecting Experience Cleaning Water

AGE GROUP

7+

AMOUNT OF PEOPLE

3+

TIME

1 - 3 HOURS

OBJECTIVE

To learn how water is kept clean and made drinkable in your community.

MATERIAL

n/a

Instructions

If possible, plan a visit to a place in the local area, such as a water cleaning plant. Alternatively invite someone who works there, or a local innovator working on a clean water project, to come and speak to the group.

If neither of these options are possible, participants could research different ways water is cleaned around the world.

After their visit or research, have the participants come up with methods to ensure their water is clean and safe when outdoors.

Debrief:

- ▶ What do you think is the most eco way to clean water?
- ▶ What is the most common way in your area?
