

## Connecting Experience Innovation Station

AGE GROUP

7+

AMOUNT OF PEOPLE

5+

TIME

30 MIN

OBJECTIVE

To introduce the concept of innovation, to think outside the box.

MATERIAL

n/a

### Instructions

Set the participants a task they know how to do. For example: tie two pieces of wood together with a string or tie their shoelaces etc.

When they've completed the task, they should repeat it but using a completely different method to the first time.

### Debrief:

- ▶ Do you know what is meant by innovation? Innovation is thinking outside of the box, creating a new way of doing things or a new version of a product based on current needs. By creating a new way to tie their shoes they are all innovators!
- ▶ How hard was it to come up with a new method?
- ▶ Which idea is the best innovation for this particular task?
- ▶ Can you think of a reason you might need to innovate something?
